

The 4-Step AI Data Readiness Pipeline

Raw,
Unstructured
Data

Step 2 *Cleanse & Filter*

Key Process:
Remove duplicates,
irrelevant data, and impute
missing values to ensure
integrity.

Step 1 *Unify & Standardize*

Key Process:
Consolidate data from
multiple sources.
Standardize all formats
(dates, currency, IDs).

Step 3 *Enrich & Secure*

Key Process:
Add metadata & structure
(chunking docs). Redact PII
and apply access controls.

Step 4 *Govern & Automate*

Key Process:
Automate the pipeline with a
refresh cadence. Implement
ongoing quality checks to
prevent data rot.
